

ABSTRACT

Late Bilateralization of Retinoblastoma – A Case Report

**Saemah Nuzhat Zafar, MCPS, FCPS, FRCS, Ayesha Khan, FCPS, FRCS, Clinical Fellow
in Pediatric Ophthalmology**

We report the growth, clinical course and laser treatment of retinoblastoma in the fellow eye of a patient seen at an interval of 9 years after one eye was enucleated for retinoblastoma at the age of 3 months. Al-Shifa Journal of Ophthalmology 2008; 4(2): 75-77 © Al-Shifa Trust Eye Hospital, Rawalpindi, Pakistan.
