

Toxic optic neuropathy and bilateral symmetrical putamen infarcts

Saerah Iffat Zafar¹ *FCPS FRCR*, Saqib Qayyum Ahmad², Saemah Nuzhat Zafar³ *MCPS, FCPS, FRCS, Clinical fellow in Pediatric Ophthalmology*

Abstract:

The presented case describes the correlation of ocular findings with those of neuroimaging in a patient having a history of methanol ingestion prior to development of painless loss of vision. *Al-Shifa Journal of Ophthalmology* 2012; 8(1): 42-44 © Al-Shifa Trust Eye Hospital, Rawalpindi, Pakistan.
